STUDIOS

Why order prints from us? We use Bay Photo, a professional lab known for superb color accuracy, print quality, and consistency. They carry many sizes and papers including Kodak Lustre, Giclée Canvas, ThinWrap, and MetalPrints. Prints are carefully flat-packed and shipped directly to you!

Paper Prints

We offer high-quality prints on Lustre paper. Bay Photo uses Kodak Supra Endura which provides the same fingerprint-resistance as matte paper but the same vibrant colors of glossy paper.

We also offer larger size prints on Giclée paper. Giclée Prints are made with high-quality archival inks on fine art papers using a high-resolution large format inkjet printer. The premium inks produce images with smooth tones and rich colors, making these prints ideal for extraordinary presentations.

Giclée Canvas

The Giclée process enables printing directly onto museum-quality canvas material, so prints will not separate over time. There are two different mounting options: Canvas Wrap and Canvas Stretch/Staple. Protective spray coating is applied to the surface of each print to help prevent scratches and other damage.

Canvas Wrap prints are a stylish, low-cost alternative to traditional framing wherein the print is wrapped around a stretcher frame so that 1 3/4" of the photo's edges are visible on the sides of the frame. They are delivered display-ready with hanging hardware attached.

Canvas Stretch/Staple mounting is a unique way to display your images like a fine art canvas. The print is stretched to the edge of a 3/4" thick wooden frame, and stapled around the edges, leaving the full image on the front. Canvas stretch is suitable for framing.

ThinWraps

ThinWraps are beautiful metallic paper prints with smooth satin laminate neatly wrapped around sturdy, 3/16" board. Each ThinWrap comes backed with two 3/4" thick lightweight foam blocks with holes drilled for easy hanging. The mounting blocks hold the print away from the wall for a contemporary float effect. ThinWraps 16x20 and larger are wrapped around Gatorboard, and prints 16x16 and smaller use masonite.

MetalPrints

To create MetalPrints, dyes are infused directly into specially coated aluminum sheets, creating truly archival works of art. These MetalPrints showcase a revolutionary new medium that is highly durable, waterproof, weatherproof, and ultra scratch-resistant. The high-gloss sheen gives your photos a vibrant luminescence with incredible detail and resolution.

Each MetalPrint comes backed with two 3/4" thick lightweight foam blocks and aluminum plate with drilled holes for easy hanging. When hung, these stunning prints will float off the wall.

Each print has rounded corners for your safety and the surface can be easily cleaned with any commercial glass cleaner.
